Markup Assist includes an autoconfirmer that communicates with the cloud and notifies you about markups and changes, which enables the design team to verify the integrity of the design and make changes in a matter of seconds. (video: 3:09 min.) Bill of Material (BOM): Automatically generate BOMs for assemblies, with support for multiple subassemblies in a single drawing. (video: 5:17 min.) Now the BOM can display multiple subassemblies without using separate drawings. The BOM displays all parts, ports, and connectors as a single entity, regardless of the location of the parts. This enables an assembly to be shared in multiple drawings. (video: 5:21 min.) Converting drawings for CAD: Accelerate drafting and verification of CAD documents, by exporting AutoCAD files to the SolidWorks or Inventor format. The import tool enables you to import existing designs into the same or different SolidWorks or Inventor assemblies. (video: 1:37 min.) SolidWorks now supports import from AutoCAD, creating a bridge between these two popular design tools. You can also import from Inventor. (video: 1:55 min.)
